# DERICK OMONDI

40105, Maseno · +254757213694 · derickomondi591@gmail.com

## PROFILES

- linkedin.com/in/derick-omondi-254a7725b
- https://github.com/rico-del

## PROFESSIONAL SUMMARY

Aspiring Cloud and DevOps Engineer building hands-on AWS and Terraform experience through independent projects while pursuing the AWS Certified Solutions Architect-Associate certification and a Bsc in Information Technology (Expected Dec 2027).

## SKILLS

**Cloud & Infrastructure:** AWS (EC2, IAM, ECR, VPC, SSM), Terraform, Docker
**CI/CD & Tools:** GitHub Actions, Git, Linux (WSL/Ubuntu), Nginx, Bash
**Languages:** Python, JavaScript/TypeScript
**Database:** MongoDB

## EXPERIENCE

**IT Systems Support (Industrial Attachment)** | *Migori County Referral Hospital* | 2026 – Present

- Provided hardware, desktop, and networking support for a live Level 5 hospital's ambulance dispatch and internal monitoring systems, completing structured one-on-one networking training
- Identified a data-integrity defect in the dispatch application where referral facility data reset to match the referring facility post-dispatch, affecting referral record accuracy
- Manually provisioned ~70 user accounts (33 individual permissions each) for hospital staff monitoring system; proposed a role/group-based permission model (similar to IAM groups) to reduce provisioning overhead

## PROJECTS

**Munch — Catering Marketplace Platform** | *Personal Project* | 2026
**Live Demo:** https://munchcatering.duckdns.org/
**GitHub:** https://github.com/rico-del/Munch_Catering

*React Native/Expo, FastAPI, MongoDB, Docker, Terraform, AWS (EC2, ECR, IAM, SSM), GitHub Actions*

- Designed and deployed cloud infrastructure on AWS via Terraform (VPC, EC2, IAM, security groups), provisioning a production-style environment with HTTPS via Nginx/Let's Encrypt
- Refactored CI/CD pipeline from build-on-instance to build-in-CI, cutting deploy time from ~25 minutes to ~25 seconds by offloading Docker builds to GitHub Actions and pulling pre-built, vulnerability-scanned images from Amazon ECR
- Integrated Safaricom Daraja (M-Pesa) payment API with STK Push, resolving production-grade issues in IAM least-privilege access, Terraform state drift, and resource-constrained infrastructure

## EDUCATION

**Maseno University –** Kisumu, Kenya **09/2023 - Present**

- **Bachelor of Science:** Information Technology

**Agoro Sare High School –** Oyugis Town, Kenya **01/2019 – 12/2022**

- Earned Grade A- with IT related recognition and certificate.

## LANGUAGES

English – Fluent Swahili – Fluent Dutch – A2 Level

## INTERESTS AND HOBBIES

AI and Machine Learning Hackathons Music, Poetry & Writing
